
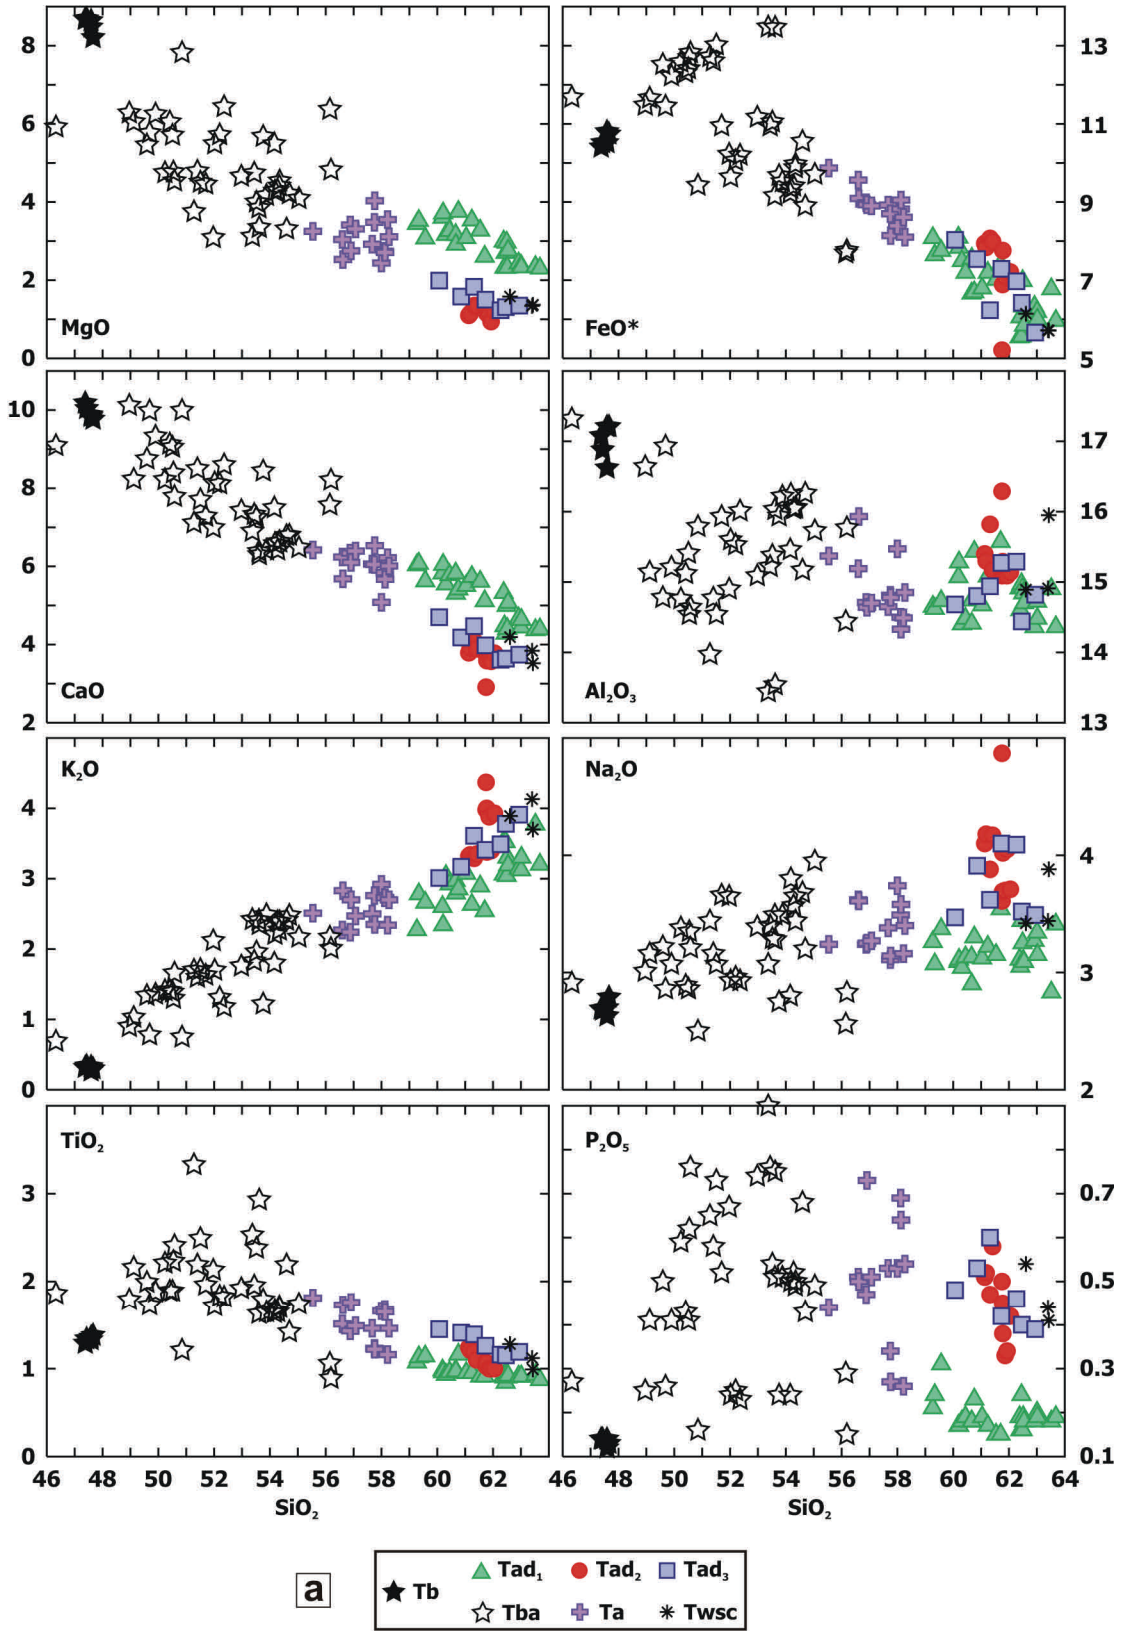

Figure 18. Harker diagrams illustrating major element **(a)** and trace element **(b)** variations of SC mafic to intermediate units. Chemical distinctions within and between SC mafic through intermediate composition units are apparent on these diagrams. For example, notice the Sr, La, Zr, and Nb differences between SC Tad units (Tad_1, Tad_2, Tad_3; green filled triangles, red filled circles, and blue filled squares, respectively).

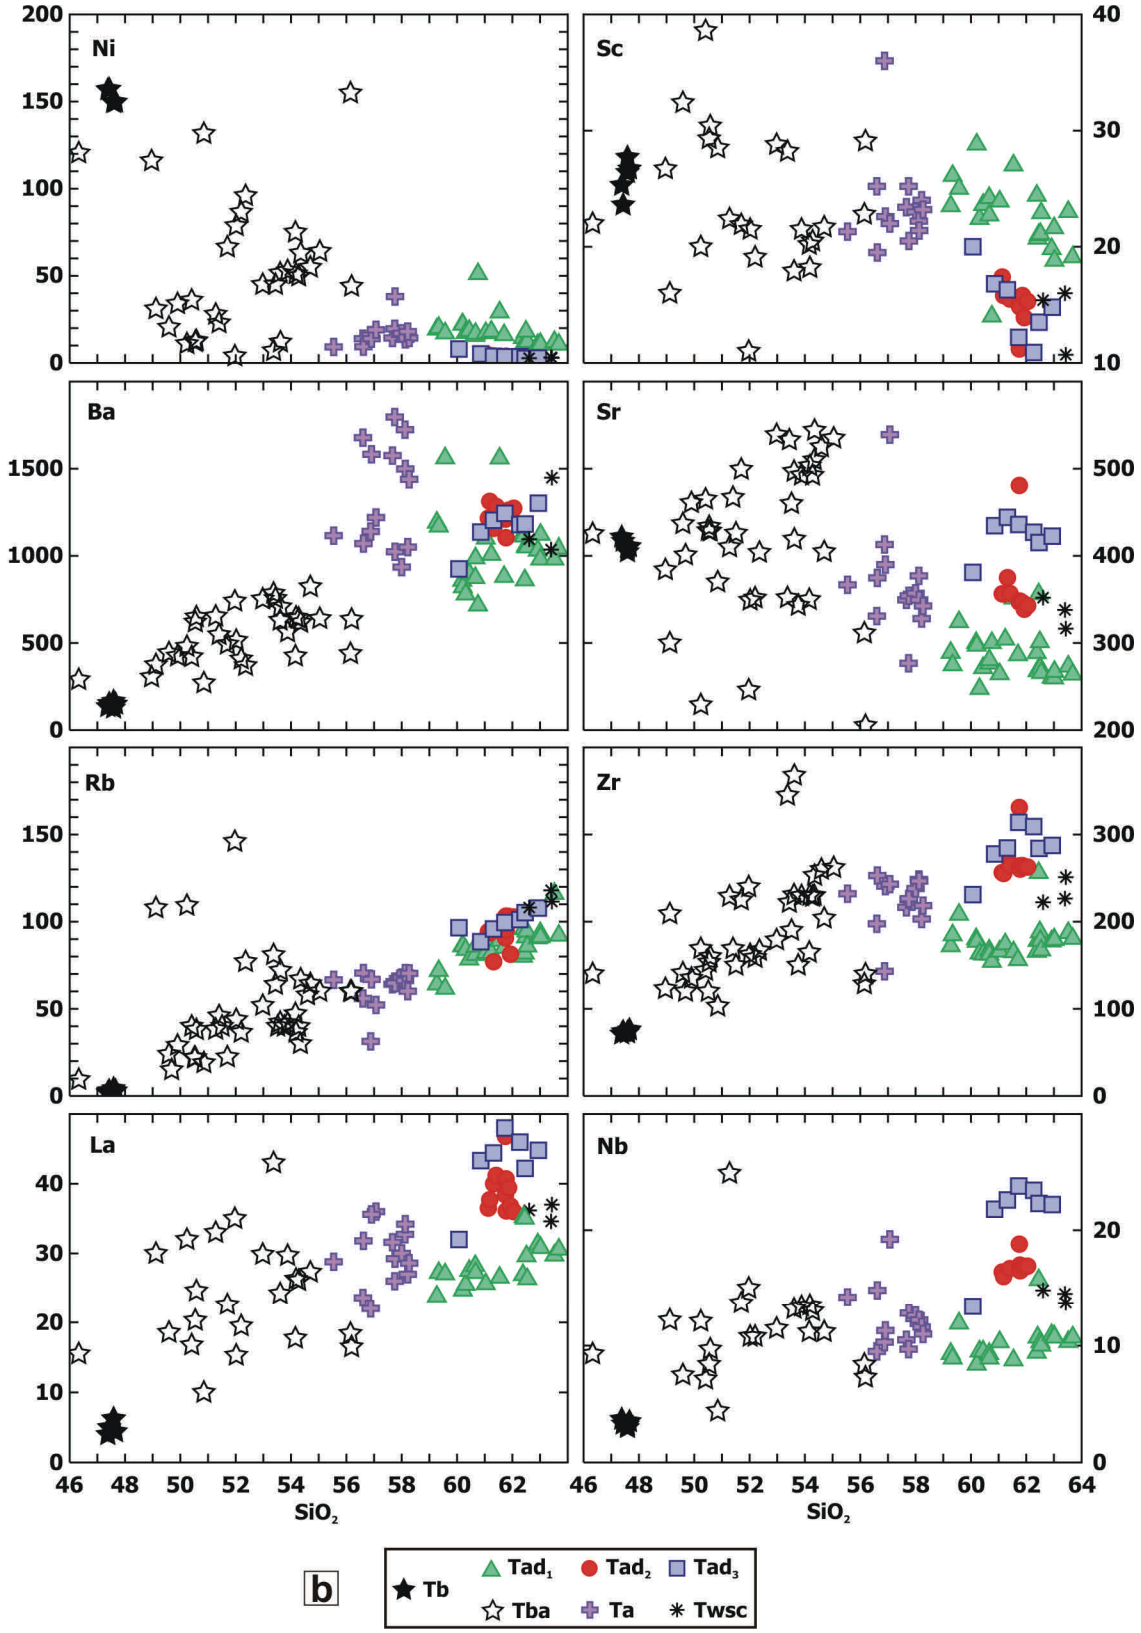

Figure 18. (continued).
