

Site Description

Sheldon National Wildlife Refuge

(updated 2010)

Geologic setting:

Geothermal features:

Virgin Valley Ranch: Showers at the Virgin Valley Campground on the Sheldon National Wildlife Refuge reportedly use water from a warm (32°C) artesian well located in C W½ Sec. 2, T45N, R26E (Cathrall and others, 1977). Warm water also flows from the bottom of a soaking pool at the campground (Williams, 1996).
