NBMG OPEN-FILE REPORT 80-1

Net Proceeds of Mines Taxes
and
Mining Employment & Payroll Data

*This information should be considered preliminary. It
has not been checked for completeness or accuracy.*

8

April 2, 1979

TO: John Schilling, Director, Nevada Bureau of Mines
FROM: Bruce D. Arkell, Consultant *BA*
SUBJECT: Net Proceeds of Mines and Mining Employment & Payrolls

Attached are county and statewide tables for the above information. Presently, the information from BLM on mining is being checked by the State BLM office, and this data will be delivered later this week.

For your information, the person to contact for the Net Proceeds of Mines is Earleen Heinz at the Nevada Department of Taxation in Carson City. Earleen was extremely helpful and does put the information out on an annual basis, essentially in the format of the attached tables. It is suggested that these tables be updated during the summer months when the taxes have been levied by the county assessors.

The information on Employment and Payrolls was obtained from Dan Culbert, Research Section, Employment Security Department in Carson City. The data is collected on a quarterly basis and has monthly data for each county. According to the Federal regulations, information cannot be made public for any county where there are less than three employers or where one employer employs more than eighty per cent of the workforce. This is the reason that only county totals are given for the three categories that data is available. The Department runs about one quarter behind in making the information available, so it is suggested that the attached tables be updated in the fall of each year. When the Department is contacted, ask for the employment and payrolls for Standard Industrial Categories 10, 13, & 14. They do have the data for each county and it is possible I am sure for your agency to obtain this data, even though you could not release the data on a county by county basis.

I am in hopes this information is what you expected, and I will be more than happy to answer any questions or provide fillins where possible.

NET PROCEEDS OF MINES

STATEWIDE TOTALS

Nevada Revised Statutes, NRS 362.100 to 362.240 inclusive, provides that the Nevada Department of Taxation shall determine the net proceeds of all operating mines and the appraisal and assessment of all reduction, smelting and milling works.

The net proceeds are determined by subtracting from the gross yield the actual cost of; (a) extracting the ore from the mine, (b) transporting the product to the place of reduction, refining and sale, (c) reduction, refining and sale, (d) marketing and delivery, (e) maintenance, repair and other items specified in NRS 362.120.

Once the net proceeds are determined, these are taxed by each county assessor at the same ad valorem rate as other property in the county is taxed.

The Department of Taxation determines the net proceeds on a semi-annual basis, no later than April 15th and October 15th of each year. The ad valorem rate is set by each county once a year, following the second billing.

The following data was obtained from the Nevada Department of Taxation.

FY	GROSS YIELD			NET PROCEEDS	TAX REV.
	METALLIC	NONMETALLIC	TOTAL		
1974	\$176,626,556	\$34,928,624	\$208,555,180	\$78,319,357	\$2,981,077

*Covers the first billing only. Taxes not levied until after the second billing.

EMPLOYMENT AND PAYROLLS

Under the provisions of Chapter 612 of Nevada Revised Statutes, the Nevada Department of Employment Security collects information from all employers in the State concerning their workforce. The employers are asked to furnish the location of the workforce, as opposed to the location where the payroll is made out or disbursed.

The information is collected on a quarterly basis and includes information for each month. The only category which is not surveyed are self employed without employees. There is no way to accurately estimate the numbers in this category but it is assumed the tables include over 95% of all persons engaged in mining in the State.

The three categories, Metallic, Nonmetallic, and Oil and Gas, include employees engaged in exploration, extraction and reduction. The firms included in the three categories are obtained from the Standard Industrial Classification Manual and are used nationwide. The state of Nevada includes geothermal employment in the Oil and Gas category.

The information in the attached tables was obtained from the Nevada Department of Employment Security.
