

## PRELIMINARY GEOLIC MAP OF THE STOCKTON FLAT WELL QUADRANGLE, LYON AND STOREY COUNTIES, NEVADA

Christopher D. Henry, Alan R. Ramelli, and David R. Boden  
2007

Contact: Solid where certain and location accurate, long-dashed where approximate, dotted where concealed.

Internal contact: Solid where certain and location accurate; queried if identity or existence uncertain.

Normal fault: Solid where certain and location accurate, long-dashed where approximate, dotted where concealed; queried if identity or existence uncertain. Ball on downthrown side.

Mainly strike-slip fault: Solid where certain and location accurate, long-dashed where approximate, dotted where concealed; queried if identity or existence uncertain. Arrows show relative motion.

Anticline: Long-dashed where approximate.

Monoline: Long-dashed where approximate, dotted where concealed; queried if identity or existence uncertain. Arrow shows direction of dip.

Head or main scarp of landslide: Long-dashed where inactive, subdued, indistinct and/or approximate. Dashed-hatches point downscarp.

Former shoreline: Long-dashed where approximate.

Vein, veinlet, or mineralized stringer: Solid where certain and location accurate.

Strike and dip of bedding:

- Inclined
- Vertical
- Horizontal

Strike and dip of compact foliation in ash-flow tuff:

- Inclined
- Vertical

Strike and dip of flow banding or flow foliation in volcanic rocks:

- Inclined
- Vertical

Individual blocks within landslide deposits (Qls):

Subsidence areas due to piping:

Scale 1:24,000

0 0.5 1 kilometer  
0 0.5 1 mile  
0 1000 2000 3000 4000 5000 feet

CONTOUR INTERVAL 10 METERS

Base map: U.S. Geological Survey Stockton Flat Quadrangle, 1985

Projection: Universal Transverse Mercator, Zone 11, North American Datum 1927 (m)

Field work: 2006-2007  
Supported by the U.S. Geological Survey STATEMAP Program  
(Agreement No. 06-HQ-AZ-0021)

**DRAFT**  
Preliminary geologic map  
Has not been reviewed after field review  
Will be revised before publication

Edited by Dick Meewis  
Compilation by Chris Henry and Alan Ramelli  
Cartography and map production in ESRI ArcGIS v9.2 (ArcGeology v1)

First Edition, December 2007  
Printed by Nevada Bureau of Mines and Geology

The map is printed on the reverse side of paper drawn from digital files. Dimensional calibration may vary between electronic copies and hard copy directions on the same plot, and paper may change size and orientation when printed. Digital files may be used in copies of the map.
