## Lowell Price

---

**From:** Allen, John (Enel North America) [John.Allen@enel.com]  
**Sent:** Tuesday, October 13, 2009 7:55 AM  
**To:** Lowell Price  
**Subject:** Stillwater II

Hello Lowell,

Greg passed your question regarding "nameplate" rating along to me. I checked with Bill and he said the "nameplate", or gross output, of Stillwater II would be 11.8 MW x 4, or 47.2 MW. That is Stillwater II only. The old plant, Stillwater I, is no longer capable of operation and has been isolated from the grid.

Hope this helps, give me a call if you have any questions regarding this.

Linda,

Here are the reports I am delinquent in. It has taken us a while to get the computer recording equipment right and records that are of use. We have worked out all the bugs and our information is pretty accurate and will allow me to get these reports completed in a timely manner. I apologize for my delinquency and promise not to allow it to happen again.

Sincerely,

A handwritten signature in black ink, appearing to read "Dennis W. Rash". The signature is fluid and cursive, with a long horizontal stroke extending to the right.
