Subject: Brady Geothermal Project, CWW#1 water production.

Dear Tom:

This letter is to confirm our telephone conversation this afternoon discussing the quarterly reporting of Brady CWW#1. Missy Payne of GDA brought it to my attention that I have been erroneously reporting the produced fluid from this well as "potable" water. In fact, it is chemically similar to the geothermal fluid, but is cooler at a reported temperature of only 88 degrees F.

Since no electricity is generated from this "cool brine" I will continue to report the CWW#1 produced volume as a separate entity from the hotter geothermal fluid. This fluid will be labeled as "Low Temperature Geothermal" or "Cool Brine". If you have any questions please call me or Missy Payne. Thank you.

Sincerely,

William L. Desormier  
Geologist
