RE: Monthly Geothermal Production & Injection Report for March, 2007

Dear Linda,

Enclosed is the March 2007 monthly report for the Empire Energy, LLC - Empire geothermal power plant. We are currently allowed to surface discharge from injection well 51-16 under NDEP Permit NEV-94003.

From November 2006 up to today, we have been using only one production well and one injection well. I spoke to Christy and she asked us to send her a detailed example of how we calculate the injection fluid when the second production well goes back on line. I will send that information as soon as the well is up and running.

Please let me know if we can provide additional information. Thank you for all your help.

Sincerely,

RE: Monthly Geothermal Production & Injection Report for January, 2007

Dear Linda,

Enclosed is the January 2007 monthly report for the Empire Energy, LLC - Empire geothermal power plant. We are currently allowed to surface discharge from injection well 51-16 under NDEP Permit NEV-94003.

The flow rates for the injection wells for this month are estimated due to instrument failure. We believe the newly installed Central Station Control wiring is having signal/communication problems with the flow meters.

Please let me know if we can provide additional information.

Sincerely,

Donna M. Stammers
Environmental Coordinator
