Dear Ms. Loomis:

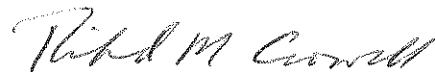

Enclosed please find reporting information for Round Mountain Gold Corporation's utilization of geothermal energy for the months of November and December, 1993. The data relates to our seasonal use of geothermal fluid to heat our leaching solution.

As per your office's request, we have translated the format and figures used by the Department of Interior - Mineral Management Service to the DOM Industrial Geothermal Electric Producers' Report, though as noted above this is not the use made of the geothermal energy.

November geothermal usage was calculated at 12,720 million Btu utilized, while December usage was calculated at 71,682 million Btu utilized.

If you should have any questions regarding the reports, please give me a call at the above number or dial direct at 377-3254.

Sincerely,

Richard M. Crowell
Environmental Engineer

Dear Ms. Loomis:

Enclosed please find reporting information for Round Mountain Gold Corporation's utilization of geothermal energy. The data relates to our seasonal use of geothermal fluid to heat our leaching solution.

As per your office's request, we have translated the format and figures used by the Department of Interior - Mineral Management Service to the DOM Industrial Geothermal Electric Producers' Report, though as noted above this is not the use made of the geothermal energy.

We have enclosed the data for geothermal use for the months of March and April 1993. From checking our records, it appears your office did not receive data for those two months, before the system was shut down. This should bring you up to date.

As our use of geothermal energy is seasonal, we have shut our production wells down for the summer and fall. We anticipate reactivation of the wells on or about November, 1993.

If you should have any questions regarding the reports, or if you require additional information, please give me a call.

Sincerely,

Richard M. Crowell
Environmental Engineer

Carson City, NV 89710

Dear Ms. Loomis:

Enclosed please find the Industrial Class Geothermal Electric Producers Monthly report. Round Mountain Gold Corporation, as you know, does not produce electrical power via our geothermal production wells. The KWH produced does not reflect the geothermal production wells' purpose. I have enclosed the BTU's produced which have been calculated, as well as the gallons produced, per well. The average temperature is given for the average temperature into the heat exchanger, and the average temperature exiting the heat exchanger.

If you have any questions please do not hesitate calling (377-2366).

Respectfully,

Shirley Badame
Environmental Engineer

February 24, 1993

Mr. Russell A. Fields
Nevada Dept. of Minerals
400 West King St., Ste. 106
Carson City, Nevada 89710

Dear Mr. Fields:

Recently it has come to our attention that the Department of Minerals has not been sent copies of the Round Mountain Gold Corporation monthly geothermal use tabulation.

Enclosed please find the monthly tabulations for March through December 1992, and January 1993.

If you should have any questions regarding the reports, or if you require additional information, please give me a call.

Sincerely,

Richard M. Crowell

Richard M. Crowell
Environmental Engineer
