

Site Description

Coyote Spring Valley

(updated 2010)

Geologic setting: Coyote Spring Valley is located between the Sheep Range (west) and Meadow Valley Mountains (east), 60 miles north of Las Vegas. Coyote Spring Valley is bisected along its dominant NNW-SSE trend by the Pahrnagat Wash.

Geothermal features: There are five warm wells and one hot well in Coyote Spring Valley, distributed relatively evenly along the 30 km length.
